

**PRODUCT DATASHEET | ETA1079**

COMBI REGULATOR 16A 230V 1.5M CORD

**DESCRIPTION**

Switches automatically between, for example, dishwasher and hot water (kitchen) boiler. In this way, two heavier consumers can be connected to one 16A electrical group by means of a master and slave contact. The slave contact is not suitable for electronically controlled consumers such as clothes dryers. When both appliances are switched on, the water heater is switched off during the dishwasher's heating time, this is to reduce consumption and prevent the electrical group from being overloaded. Max. 3,500 watts.

SPECIFICATIONS

Brand:	Power
Product type:	Combi controller
Switch design:	Other
Wall outlet design:	Perimeter (type F) (expired)
Number of sockets:	2
Operating mode:	Other
Mounting direction:	Horizontal and vertical
Attachment method:	Fastening with screw
With lighting:	No
Material:	Plastic
Material quality:	Other
Halogen-free:	Yes
Surface protection:	Untreated
Implementation surface:	Mat
Color:	Gray
RAL number (similar):	7035
Transparent:	No
Suitable for protection degree (IP):	IP44
Nom. voltage :	230 V
Nom. current socket :	16 A
