EMERGENCY POWER SUPPLY 1H LED 50V-250V

**DESCRIPTION**

SPECIFICATIONS

|                                |                                    |
|--------------------------------|------------------------------------|
| Brand:                         | Interlight                         |
| Product type:                  | WP fixtures                        |
| Mounting method:               | Built-in                           |
| Circuit type:                  | Continuous/emergency switching     |
| With remote switch connection: | No                                 |
| Feeding system:                | Decentralized (individual battery) |
| Battery Feature:               | Other                              |
| Lamp type:                     | LED not interchangeable            |
| With light source:             | Yes                                |
| Lampholder:                    | Other                              |
| Nom. voltage :                 | 220 - 240 V                        |
