

PRODUCT DATASHEET | PWCIP68
POWER IP68 CONNECTOR

DESCRIPTION

This 8.5cm Power cable connector is perfect for electrical installations in outdoor environments. Designed for both indoor and outdoor use, the connector provides full protection against water and dust. It is ideal for establishing waterproof connections, such as for power cables in outdoor areas. This connector is specifically designed for cables with a cross section of 0.5 to 2.5 mm², where the outer diameter of the cable must be between 6.0 and 9.0 mm.

Making the connection is easy, as the cable connector functions as a crown connector with a screw connection. The cable wires are inserted into the connector and screwed securely for a reliable connection.

SPECIFICATIONS

Brand:	Power
Product type:	IP68 Connector
Type of insulation material:	Plastic
Suitable for:	H07RN-F
