

PRODUCT DATASHEET | IL-T4INPUT
THINQ 4 INPUT CONTROL MODULE

DESCRIPTION

The T4 input module can digitally convert an analog input from a switch or, for example, an alarm system where the Thing system transmits it wirelessly. Thus, a normal wall switch can then provide an input whereby the Thing system wirelessly switches the lights on or off.

Note: This component requires constant current.

SPECIFICATIONS

Brand:	Interlight
Product type:	Module
Type of accessories/parts:	Other
Section:	No
Accessories:	Yes
Color:	Black
Width:	40 mm
Height/depth:	20 mm
Length:	40 mm
